

YOUR CHOICE FOR HEALTHY SWINE

Bioseutica the global leader in lysozyme has developed Entegard®, an innovative range of products, designed to overcome the challenges of livestock RWA (Raised Without Antibiotics). Administered via feed or drinking water Entegard® helps to maintain a healthy gut flora and gut barrier function by sustaining the structural integrity of the intestinal wall through its direct and natural antibacterial activity. This leads to optimum nutrient absorption, improving the health and growth performance of livestock. Entegard® can be used safely without provoking microbial resistance. The Entegard® formulations are designed to provide protection and restore microbiological balance. Its mode of action stems from lysozyme, one of the active components. Combined with an organic acid it creates a synergistic antibacterial activity, which give Entegard® its health enhancing benefits.

➤ WHY ENTEGARD®?

- Entegard® is ideally suited for antibiotic-free (ABF) swine operations
- Entegard® improves the health and growth performance of swine
- Entegard® sustains a healthy small intestine microbiota
- Entegard® leads to optimum nutrient absorption
- Entegard® provides a strong antibacterial activity against gram positive and gram negative bacterial challenges
- Entegard® promotes clearance of microbial debris and boosts immune system in swine

➤ ENTEGARD® IS EASY TO USE

Entegard™ WS has a formulation which makes it easy to handle and use. It can administered simply by mixing in mash feed, or dissolving it in drinking water. It can also be used in post-pellet spray application.

Relevant EU regulation for ENTEGARD®: Composition is regulated in the EU under regulation 767/2009, EU regulation 68/2013. ENTEGARD® falls under producer identifying number: NL210707 (according to article 9 of EU regulation 183/2005).

ENTE GARD® is produced with highest standards that guarantee traceability to source.
